

Hajim School OneRochester Campaign

On behalf of the Hajim School leadership team, we thank you for the incredible work you perform each and every day.

The OneRochester Campaign now provides an additional way for you to make an even greater impact **by making a donation, of any amount, to what you care most about, including the Hajim School.**

As a member of the Hajim School community, there are several opportunities you may be interested in supporting through the OneRochester Campaign.

DATA SCIENCE

Data science is the defining discipline of the 21st century, and among the University's top priorities. The Data Science Initiative features the creation of a new Institute for Data Science and includes the construction of a state-of-the-art building to house it, as well as support for as many as 20 new faculty members with expertise in the field. All the data in the world means nothing without trained professionals to harness its power. The faculty, researchers and students at the University of Rochester are helping make it happen. Your gift to the Dean's Fund for Data Science will have a direct impact on the growth and success of this new initiative.

STUDY ABROAD

Hajim students are competing in a global economy. It's important to have a competitive edge by having an international perspective. The Hajim School has preselected a number of Study Abroad programs in seventeen countries around the world in which Hajim students will earn appropriate credits while enhancing their four year program of study. Your gift to the Hajim School will help to provide students the opportunity to have a life-changing event and will give them a significant step ahead of others in their field who do not have the same opportunity.

HAJIM SCHOOL ANNUAL FUND

Your gift to the Hajim School Annual Fund will offer funding that provides a broad array of vital programs and services, including financial aid to undergraduate and graduate students which helps us to attract and retain the best and brightest students and faculty, seed funding for new programs such as Audio Music Engineering and the Center for Medical Technology Innovation, as well as funding for our latest initiatives in "hands-on" learning in the Fabrication/Innovation Lab housed in Rettner Hall.

DEAN'S FUND FOR (YOUR DEPARTMENT HERE!)

So you would like to support your own department?

Great idea! Your gift to the Dean's Fund for your specific department will do just that. These funds will enable your engineering department to expand course offerings, purchase lab equipment and provide hands-on experiences to engineering students.
