

School of Nursing OneRochester Campaign

OneRochester, our workplace giving campaign, provides an opportunity for you to support something that matters to you.

There are many ways you can participate, funding areas such as scholarships and graduate fellowships, to innovation, to our annual funds.

Our Advancement team is available to help you explore opportunities for giving to your department or other areas of interest to you.

Or, choose from the options below to make a gift that is most meaningful for you.

SCHOLARSHIPS & GRADUATE FELLOWSHIPS

Your gift will provide financial incentives for aspiring nurses to choose the School of Nursing and help reduce the debt they carry into their professional lives. Fellowships provide a competitive edge in recruiting the most talented graduate students from around the world—those with the greatest potential to impact our profession. These students, along with faculty, will help us continue to build a first-class learning environment.

INNOVATION FUNDS

With your help, the possibility of slowing cognitive impairment in the elderly or developing a way to protect minds from depression will become a reality. By supporting our innovation funds, you give nurse scientists and clinicians the opportunity to pursue creative solutions and develop new models of care. This pilot and bridge funding is often enough to yield results that lead to additional funding from the NIH and major foundations.

ANNUAL FUNDS

Current use annual funds allow us to enrich and expand the opportunities for our students; from developing new educational programs, to allocating vital financial assistance for talented and deserving students. Through your support, students have access to some of the most cutting-edge researchers, curricula and learning facilities, ensuring they receive the exceptional nursing education our School is known for.
