

# GENETICS DAY May 7, 2010

## 8th Annual Fred Sherman Lectures

### Class of '62 Auditorium URM

#### Morning Session Highlights Research at the University of Rochester

**Alan Smrcka**

*"Small molecule modulation of protein-protein interactions in G protein signaling"*

**Brad Berk**

*"Genetics of vascular remodeling"*

**Rudi Fasan**

*"Molecular discovery with engineered P450 enzymes"*

**Charles Thornton**

*"Antisense therapeutics for genetic disease:  
New luster on an old magic bullet"*

10:00 am – 12:45 pm

**Stuart Schreiber, Ph.D.**

*Harvard University  
Howard Hughes Medical Institute*

**"Relating the genetic features of cancers  
to drug efficacies using small-molecule probes"**

4 pm - 5 pm
