

It's Your Choice

You should feel safe and comfortable every time you have an appointment with one of the UHS primary care doctors and nurse practitioners.

Sometimes, in order to find out what is causing the symptoms you are having, we may need to do a physical examination that requires you to undress and put on a gown.

If you would feel more comfortable having a second UHS staff member in the exam room during that type of examination (sometimes called a “sensitive exam”), we will make sure to do so.

Please let a UHS staff member know your preference when asked.
