LiDA Colloquium Series

Exploring GenAI Tools for Instruction

Tuesday, April 9, 3:30-4:30 pm EST

To register:

https://rochester.zoom.us/meeting/register/tJwqfu2gqD4pHdTdJul_uVEYsxByRlWX5LAx#/registration

In this session we will benefit from the reviews conducted by students in a doctoral seminar on "AI for educators" offered to Warner students in Spring 2024, to get a better understanding of the potential of GenAI to support instruction. Because of the number of interesting GenAI tools, this session will have a slightly different format, with a first set of conversation starters introducing three categories of tools – to support research, to support teachers, and for visual creation, followed by longer than usual breakout rooms when some of the tools will be introduced and discussed in more depth.

"Conversation starters":
   A. **GenAI tools to support research** *(Luke Hands and Md. Mamunur Rashid)*
   B. **GenAI tools to support teaching** *(Dardan Shabani, Liz Conroy, Yamin Zheng, Chang Liu, Adma Gama)*
   C. **GenAI tools for visual creation** *(Jialin Yan, Mingming Yao, Dan Hart)*

Please join us in this public and free event, so we can all learn from each other's experiences and insights
